"ZERO U" HORIZONTAL RACKORGANIZER®

RACKORGANIZERS THAT ROCK YOUR RACK

The A'n D Cable patented Horizontal "Zero U" RackOrganizer® System manages all your cables on 19" equipment racks and cabinets (front and back) without using ANY valuable rack space.

Revolutionize your rack space.

Your goal is to optimize efficiency, cost, and ease of use. The "Zero U" Horizontal RackOrganizer® returns

rack space to you by routing cables in the same space as your device.

When you have a rack retrofit job, 25-35% of your space is occupied by traditional cable management that uses 1U or 2U. Use our "Zero U" Horizontal RackOrganizer® to make room on your rack.

Recover space for more devices including the power supplies required for broadband, and

create room for air circulation to keep your rack cool.

To build a new rack, take the "Zero U" advantage and stack more active devices with room for cooling. All racks with a standard rack screw pattern can use the "Zero U" Horizontal RackOrganizer® to maintain a balance between cable managers and cable density support.
