UNITAG® CABLE ID

LABELS THAT SNAP, NOT STAB

The A'n D Cable patented Unitag® Cable ID is a plastic snap-on labeling system that provides a quick and easy way to mark and identify cables.

Revolutionize your rack space.

Save time, money, and your skin. The Unitag® Cable ID can be used on virtually any size cable or groups of cables.

Reduce the number of flag ties so your labels are easier to see and your cables are easy to follow.

Each Unitag® Cable ID has a big enough surface for you to include all the information on each Unitag®. The the smooth snap-on, snap-off Unitag® Cable ID won't snag your skin like traditional flag ties.

Mark each Unitag® to show "near end" and "far end" terminations of the cable before snapping it onto the cable.

Use the Unitag® Cable ID to identify cables easily. Simply locate the cable, find the Unitag®, snap off the tag, view the label, then return the label.

This easy procedure leaves the cables undisturbed, reducing the chance of unintended disconnects.
